

QUANTUM WELLNESS

frequency device*

WHAT IS HEALY?

Healy is a holistic frequency device that can support optimal wellness on every level of your being.

The next evolution in biohacking, Healy is a quantum self-care tool that acts as a bridge between the quantum field and our biological body using groundbreaking technology.

FDA cleared for use in the management of pain, Healy devices also have a number of non-medical applications for overall well being.

Developed by Marcus Schmieke, a quantum physicist and Vedic monk, Healy has one foot in the physical sciences and one foot in the realm of the spiritual ether. The place where science meets spirituality is the playground of possibility. Healy gives us the ability to tap into that frequency and pair it with our intentions to allow us sovereign influence over our own well-being.

Here's what Marcus has to say about this technology:

*“All matter consists of energy vibrating at different frequencies. Therefore, Healy technology is based on my belief that electromagnetic fields vibrating at Quantum Analyzed Frequencies **can provide the body with the information and energy it needs to harmonize its own energetic self-organization and self-repair.** These specific frequencies can take the Bioenergetic Field of the body to a state of higher order, manifesting itself in holistic health, wellbeing and vitality.”*

The Healy device uses targeted frequencies to support a variety of outcomes ranging from relief of pain, holistic organ support, balancing of emotions, increased focus and concentration to nervous system regulation, fitness recovery, sleep support, stress management, chakra balancing and SO much more.

THE MAGIC OF FREQUENCY

"Everything is energy and that's all there is to it. Match the frequency of the reality you want and you cannot help but get that reality. -ALBERT EINSTEIN

What we think of as our body is actually mostly empty space. The matter that we do consist of at its most fundamental level is made up of energy. Every part of us has a unique energetic signature that can be quantified in the frequency of this energy. Every tissue type, every organ system, every heartbeat - all boil down to a frequency code that can be analyzed, interpreted and influenced.

Under optimal circumstances, the frequencies emitted by the body support health, wellness and vitality. Unfortunately, many of us are not living under ideal circumstances. By using targeted frequency support - like what's offered with the Healy device - we can help ourselves come into resonance with a desired outcome.

The power of frequency to support holistic wellness has been known for a long time, yet in the 1930's the AMA essentially outlawed frequency, along with herbal medicine and homeopathy in favor of emerging Pharma.

The focus became on the chemical rather than the electrical. But the reality is our body is essentially a motherboard in which electricity travels through the waters and fascia (mostly composed of crystalline water) of our bodies.

The voltage of our cells is in direct correlation to our holistic well-being. Inflammation and dis-ease comes from a decrease in cellular voltage. And, microcurrent essentially recharges our batteries.

Raising our cellular voltage increases our cell's membrane potential and this is the magic of microcurrent before you add on specific targeted frequencies.

With the coil + Mag we add in vector potential waves + pulsed magnetic frequencies, as well as the scalar with the Healy working through quantum entanglement. Each delivery system works synergistically to address our entire energetic system as a whole which then influences, balances + harmonizes the whole of our physical bodies.

We gain an incredible amount of sovereignty and agency on our path to greater physical, mental, emotional + spiritual well-being and radiance.

HOW DOES IT WORK?

The proprietary quantum sensor in the Healy scans a users biofield for energetic imbalances on a mental, physical and spiritual level.

The device then compares these imbalances against a group of more than 10 million frequencies and creates personalized user recommendations for the programs that would best support optimal wellness.

These frequencies can be delivered to the user via scalar waves across the quantum field, or directly applied to the body in the form of individualized microcurrent frequencies.

Delivery of microcurrent frequencies is done through wearable wrist straps or sticky pads on a localized area for pain management.

Studies have shown that microcurrent frequencies have the ability to increase ATP (the primary cellular fuel source) production up to 500%, increase protein transport 40% and increase protein synthesis within the cell by 70%.
